

Geocheminar ---- Fall Quarter, 2017

Date	Speaker	Title
Oct. 2	student organized	TBD
Oct. 9	Paul Warren UCLA	New forms of late fluid/redox alteration in basaltic meteorites (eucrites)
Oct. 16	Jabrane Labidi UCLA	Sulfur isotope evidence for photochemistry and ice transport in the early solar system
Oct. 23	Melanie Barboni UCLA	Zircon: the magmatic time capsule
Oct. 30	Beth Ann Bell UCLA	Zircon alteration: the Good, the Bad, and the Ugly
Nov. 6	student organized	TBD
Nov. 13	Dustin Trail University of Rochester	Silicon isotopes in zircon
Nov. 20	Thomas Kruijer Lawrence Livermore National Laboratory	Hf-W chronology of iron meteorites: Implications for the radial structure of the solar protoplanetary disk
Nov. 27	Issaku Kohl UCLA	Doubly substituted isotopologues of methane: Insights into production mechanisms and mixing in natural systems
Dec. 4	student organized	AGU practice talks
